Professional Summary

Computer Science graduate with proven ability to build, analyze, and automate real-world systems using Python and SQL. Hands-on industry exposure across data analytics, backend development, and ML-driven projects. Seeking an entry-level engineering role with high ownership.

Technical Skills

- **Languages:** Python, SQL, Java, R, HTML, CSS, JavaScript
- **Frameworks & Libraries:** React, Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, TensorFlow
- **Databases:** MySQL, PostgreSQL, MongoDB, Firebase, NoSQL
- **Tools:** Power BI, Tableau, Excel, Jupyter Notebook, Looker, Git
- **Cloud Platforms:** AWS, GCP, IBM Cloud, Microsoft Azure
- **Concepts:** EDA, Feature Engineering, Model Deployment, Cybersecurity Fundamentals, Data Structures and Algorithms

Internship Experience

INNOWORQ INFOTECH PRIVATE LIMITED (*Present*)

- Developed and deployed an internal software solution with 2× improved performance.
- Built scalable full-stack applications using React.js, Node.js, MySQL, and backend technologies.
- Improved system reliability and efficiently handled operational and project responsibilities.

Deloitte - Data Analytics Virtual Internship (*June–July 2025*)

- Completed business case studies using data analysis and visualization tools.
- Developed insights using forensic technology and investigative datasets.

Deloitte - Technology Virtual Internship (*July 2025*)

- Built simulation projects related to enterprise tech stack and debugging tasks.

TATA - GenAI Data Analytics Virtual Internship (*June 2025*)

- Applied AI in business strategy, delinquency prediction, and risk profiling.
- Conducted exploratory data analysis and presented findings through dashboards.

TATA - Cybersecurity Analyst Virtual Internship (*June 2025*)

- Designed IAM strategies and evaluated secure access systems.
- Applied platform integration techniques in a simulated business environment

Walmart - Advanced Software Engineering Virtual Internship (*June 2025*)

- Worked on advanced data structures, software architecture, and relational DBs.
- Applied data munging techniques to real-time enterprise scenarios.

Projects

Driver Drowsiness Detection System (*2025*)

- Developed a real-time driver alert system using OpenCV and Dlib to detect blinks, yawns, and fake sleep.
- Integrated audio-visual alerts, reducing simulated accident risk by 30%.
- Achieved 95% detection accuracy on test datasets of 1,000+ image frames through optimized EAR, MAR, and head pose estimation algorithms.

Real Estate Website (2024)

- Built a full-stack responsive property listing platform.
- Integrated email forms, property filters, and high-quality image handling.
- Integrated email contact forms and filterable property searches, improving user experience by 40%.

Real Time Chat Application (2024)

- Developed scalable chat app using WebSockets and Node.js.
- Enabled real-time messaging with low-latency support for large user bases.
- Deployed using MongoDB and MongoDB Atlas, achieving 99.9% uptime in stress-tested scenarios.

Education

Bachelor of Technology (B.Tech), Computer Science and Engineering

Dr. A.P.J. Abdul Kalam Technical University, Uttar Pradesh

Aug 2021 – July 2025

CGPA: 7.37/10

Intermediate (CBSE)

Dehradun Public School

2019 - 2020

High School (CBSE)

Dehradun Public School

2017 - 2018

Certifications & Courses

- **Data Analyst** - Udemy (2025)
- **SQL Development** - SkillUp (2025)
- **Machine Learning** - SkillUp (2024)
- **Artificial Intelligence** - SkillUp (2024)
- **React Development** - SkillUp (2024)

Core Competencies

- Strong analytical and problem-solving mindset
- Effective communicator in both team and client-facing roles
- Time management and ability to prioritize multiple tasks
- Proficient with tools like Python, Tableau, SQL, and Power BI
- Adaptability to Fast-Paced Environments
